

HYBEX EXTENSION NUMBER

How do I find the extension number of a Hybex phone?

If the phone has a display the extension number is displayed in the top left hand corner of the display when the phone is not in use.

If the phone is in Do not Disturb mode then DND will show in place of the extension number and the DND key should be lit. Press DND to turn DND off and the extension number will be displayed.

If a phone does not have a display, make an intercom call to a phone that does have a display and the display on the receiving phone will show the extension number of the calling phone.
